CHARACTERISTICS

- Extreme wear resistance;
- High resistance to oxidation;
- Improved friction characteristics;
- Excellent low temperature properties, down to -43°C ;
- Prevents foaming;
- High ability to withstand loads;
- Neutral with respect to sealing materials.

EFFECTS

- Provides fuel economy;
- Increases the service life and power of the transmission mechanism;
- Exceptionally reliable operation under extreme conditions;
- Good operability at low temperatures;
- Stability of viscosity also at high loads at high temperatures;
- Year-round use.

DISPOSAL

- ATF 6000 waste oil is classified as Category 2 waste and must be disposed of in designated areas.
